Subtle, Discreet Anti-wrinkle Treatments

Facial Rejuvenation

Modern facial rejuvenation techniques have given us simple, subtle non-surgical solutions to combat the effects of ageing. At Ock Street Clinic we only use medically proven, safe techniques performed by our highly-qualified experts to ensure that the results you receive are not only understated and natural looking, but absolutely right for you.

Botox®

Botox® is a popular non-surgical injection that temporarily reduces or eliminates frown lines, forehead creases and crows feet. The injection temporarily relaxes the muscles that cause wrinkles and gives the skin a smoother, more youthful appearance. We pride ourselves in our subtle and gentle results.

Dermal Fillers

Deeper expression lines, folds and furrows can be gently softened by “filling” with safe, reversible products known as dermal fillers. The plumping agents are carefully injected into problem areas and can also be used to lift the brow, correct dark circles under the eyes and define the cheeks, for an understated but effective rejuvenation.

The Very Best Advice...

Our consultant Mr Richard Caesar would be pleased to discuss your options with you and there is no obligation to proceed with treatment

protect · restore · rejuvenate
