

Minor Procedures, Expertly Performed, For Great Results

Minor Surgical Procedures

We are pleased to offer a selection of carefully chosen procedures at Ock Street Clinic performed by our Consultant Surgeon Mr Richard Caesar in the safe and comfortable surroundings of our practice.

Mole & Skin Tag Removal

Most patients want moles or skin tags removed because they feel that they are unattractive or because they protrude and cause irritation during activities such as shaving. At Ock Street Clinic our cosmetic expert can quickly and safely remove these blemishes from anywhere on the body leaving a barely discernible or even invisible scar.

Eyelid Lifts or Eye Bag Removal (Blepharoplasty)

As we age it is common to develop eye bags and hooding of the upper eyelid, lower eyelid or both, which can make you appear tired and look years older. During an eyelid lift a small amount of surplus skin and tissue is carefully and precisely removed to give a smoother and firmer appearance to the eye area. A relatively simple procedure that can have remarkable results.
